InfoTools™ FlowChart

FIG. 5

FIG. 5 is a flowchart illustrating the process of the InfoTools™ system. The process begins with a User selecting text, which leads to a 'Copy' step and a decision point: 'Will user accept charges?'. If 'No', the process ends at 'Done'. If 'Yes', it proceeds to 'Update Transaction' and 'Copy to Clipboard', also ending at 'Done'. The main flow then branches into several search and analysis functions: 'Ebrary Search Same Document', 'Ebrary New Doc Search', 'Web Search', 'Explanation', 'Who', 'Location', 'Translation', and 'Definition'. Each function involves 'Get selected Text' and subsequent steps like 'Format URL', 'Query Web server directly', and 'Format and display response'. The 'Translation' function includes a 'User chooses language' step. The 'Explanation', 'Who', 'Location', 'Translation', and 'Definition' functions all lead to a 'More...' step, which then leads to 'Copy' and finally 'Close', ending at 'Done'. The 'Ebrary Search Same Document' function includes a 'Query Server for Next Occurance in this doc' step, leading to 'Seek to and select text' and then 'Done'. The 'Ebrary New Doc Search' function includes a 'Choose search fields Subj, etc' step, leading to 'Format URL' and 'Send URL to Web browser', which then leads to 'Display browser window in front' and 'Done'.
